

Network of Asian Environmental Philosophy

Call for members

We are developing a **Network for Asian Environmental Philosophy**, to facilitate exchanges between scholars, and to make their work more visible. Our primary goal is to support works related to environmental philosophy within Asian traditions of thoughts broadly conceived or related to grassroots perspectives on environmental issues in Asia. We want to provide a **platform to foster communication and exchanges** between people working in Asian environmental philosophy.

Would you be interested in joining us?

We plan to create a **mailing list** to share with each other new publications and events related to Asian Environmental Philosophy. If you agree, we would also like to add your name, interests and publications on the **website** (www.asiaenviphilo.com), so that other scholars can find you easily. If you are interested, please **fill the form on the website** (<https://asiaenviphilo.com/get-connected/>).

The network is fully non-profit and based on volunteer work by some members. We use English as communication language, but we are very happy to include your publications in other languages.

If you know anybody else who might be interested in our project, feel free to **share** this information with them and in your own network.

Feel free to **contact us** if you have any question or comment.

Thank you very much for your consideration.
